

NUTRITION EDUCATION PROGRAM 2016 ANNUAL REPORT

OUR FOCUS

The Kentucky Nutrition Education Program works in all 120 counties to improve the lives of limited-resource Kentuckians through education and changes in behavior and in community. Through the Supplemental Nutrition Assistance Program Education (SNAP-Ed) and the Expanded Food and Nutrition Education Program (EFNEP), the University of Kentucky Cooperative Extension Service has agents and nutrition assistants across the state who are dedicated to improving lives in their communities.

OUR CHALLENGE

Poverty

In Kentucky, household median income is **\$45,215**, which is much lower than the U.S. median of **\$55,775**.¹ Kentucky has high rates of poverty and food insecurity when compared to the United States as a whole.¹

	Kentucky	U.S.
Total Poverty	18.5%	14.7%
Child Poverty	25.9%	20.7%
Food Insecurity	17.6%	13.7%
Very Low Food Secure	7.3%	5.4%

In 2014, an estimated **1,193** Hancock County residents lived in poverty, and **413** of them were children. This is a **2.0%** increase in total poverty and **6.4%** increase in child poverty since 2007.²

SNAP benefits

Participation in the SNAP program among those who are eligible for its benefits is higher in Kentucky than in the U.S. as a whole.¹

In 2015, **941** Hancock County residents received SNAP benefits, a **22.3%** increase since 2007.³

	Kentucky	U.S.
SNAP Participation	91%	83%

Obesity

Nearly half of all American adults experience one or more preventable, diet-related chronic conditions, such as high blood pressure, cardiovascular disease, type 2 diabetes, and obesity.⁴ Kentucky has a high prevalence of hypertension, diabetes, and obesity, ranking in the top 10 when compared to other states.⁵ A large body of evidence shows that healthy eating habits and regular physical activity can help people achieve and maintain good health and reduce the risk of chronic disease throughout life.⁴

In 2013, **2,176** Hancock County residents were considered obese, representing **34.5%** (**41.8%-27.7%**) of the county's population.⁶

OUR SOLUTION

Provide hands-on, nutrition education to limited-resource audiences, focusing on:

- Buying and preparing healthy foods
- Developing new meal planning and cooking skills
- Adopting new healthy lifestyle behaviors
- Managing SNAP resources

In 2016, **1,670** Hancock County residents with limited resources participated in nutrition education lessons.

OUR RESULTS

IN KENTUCKY

Lifestyle improvements

In 2016, **95%** of adult participants made a positive change in food group choices and **71%** showed improvement in one or more food safety practices. In addition, **65%** began to plan meals in advance more often and **71%** used the “Nutrition Facts” on food labels to make food choices more often. Youth participants also experienced behavior changes, with **83%** improving their ability to choose healthy foods.

OUR SUCCESS

Program creates community garden for seniors

The expendable income of most rural households has tightened. Families need affordable ways to provide healthy food for themselves. They also want to have confidence in the food supply chain and are eager to know firsthand the source of the feed they consume. Many households have been removed from food production and are now seeking information on how to produce their own food.

This year, a community-raised bed garden was grown to exhibit a variety of high-yielding, cost-effective, and nutritious plants. The fruits and vegetables collected from this garden are being used to produce healthy lunches for senior citizens throughout our county while young community members watch and learn how to plant, fertilize, and spray crops for a productive growing season.

The University of Kentucky Cooperative Extension Service in Hancock County has utilized numerous Extension publications, as well as SNAP-Ed funding and healthy lifestyle information, to conduct one-on-one training sessions on the production of food with individuals who want to then implement these practices in their homes and gardens. Some comments from the senior citizens involved include: “I’m really surprised how much food is produced in a raised bed” and “I love having the fresh fruits and vegetables I have helped grow as part of my daily meals.”
