Lyon County

NUTRITION EDUCATION PROGRAM 2016 ANNUAL REPORT

OUR FOCUS

The Kentucky Nutrition Education Program works in all 120 counties to improve the lives of limited-resource Kentuckians through education and changes in behavior and in community. Through the Supplemental Nutrition Assistance Program Education (SNAP-Ed) and the Expanded Food and Nutrition Education Program (EFNEP), the University of Kentucky Cooperative Extension Service has agents and nutrition assistants across the state who are dedicated to improving lives in their communities.

OUR CHALLENGE

Poverty

In Kentucky, household median income is \$45,215, which is much lower than the U.S. median of \$55,775. Kentucky has high rates of poverty and food insecurity when compared to the United States as a whole.

	Kentucky	U.S.
Total Poverty	18.5%	14.7%
Child Poverty	25.9%	20.7%
Food Insecurity	17.6%	13.7%
Very Low Food Secure	7.3%	5.4%

In 2014, an estimated **1,108** Lyon County residents lived in poverty, and **287** of them were children. This is a **10.2**% increase in total poverty and **28.1**% increase in child poverty since 2007.²

SNAP benefits

Participation in the SNAP program among those who are eligible for its benefits is higher in Kentucky than in the U.S. as a whole.¹

In 2015, 730 Lyon County residents received SNAP benefits, a 61.2% increase since 2007.³

	Kentucky	U.S.
SNAP Participation	91%	83%

Obesity

Nearly half of all American adults experience one or more preventable, diet-related chronic conditions, such as high blood pressure, cardiovascular disease, type 2 diabetes, and obesity. Kentucky has a high prevalence of hypertension, diabetes, and obesity, ranking in the top 10 when compared to other states. A large body of evidence shows that healthy eating habits and regular physical activity can help people achieve and maintain good health and reduce the risk of chronic disease throughout life.

In 2013, **2,343** Lyon County residents were considered obese, representing **33.3%** (**39.6%-27.0%**) of the county's population.⁶

OUR SOLUTION

Provide hands-on, nutrition education to limited-resource audiences, focusing on:

- Buying and preparing healthy foods
- Developing new meal planning and cooking skills
- Adopting new healthy lifestyle behaviors
- Managing SNAP resources

In 2016, 3,193 Lyon County residents with limited resources participated in nutrition education lessons.

OUR RESULTS

IN KENTUCKY

Lifestyle improvements

In 2016, 95% of adult participants made a positive change in food group choices and 71% showed improvement in one or more food safety practices. In addition, 65% began to plan meals in advance more often and 71% used the "Nutrition Facts" on food labels to make food choices more often. Youth participants also experienced behavior changes, with 83% improving their ability to choose healthy foods.

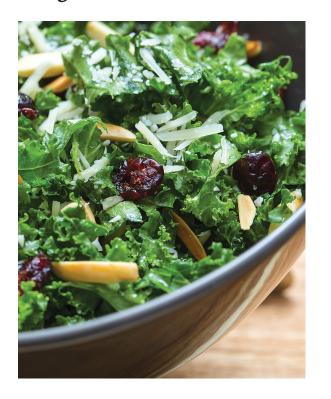

OUR SUCCESS

Lyon County wins the battle in Weight Loss Wars

ccording to the CDC's County Diabetes Atlas, 33% of adults over the age of 18 in Lyon County are obese. As part of the Weight: The Reality Series program, Lyon County Cooperative Extension, in friendly competition with Caldwell County Extension, competed in Weight Loss Wars. The program teaches participants to aim for a healthy weight by understanding body mass index, participating in physical activity, learning how to read nutrition labels, practicing portion control, and planning meals.

Participants were surveyed after completing of the program and all reported making a lifestyle change to improve health. Changes noted by program participants included decreasing salty food consumption, drinking more water, weight loss, making healthier food choices, increased physical activity, decreasing sugar intake, reading nutrition labels, practicing portion control, and measuring food before eating.

Twenty-seven participants competed in the six-week program, 19 of whom completed all challenges and joined in the final weigh-in. With a combined weight loss of 114 pounds, the Lyon County class surpassed their Caldwell County rivals for total pounds lost. Participants were so pleased with the outcome of the program that they have continued quarterly meetings with the group for encouragement and support as they continue to change habits for a healthier lifestyle.
