

## NUTRITION EDUCATION PROGRAM 2016 ANNUAL REPORT

### OUR FOCUS

The Kentucky Nutrition Education Program works in all 120 counties to improve the lives of limited-resource Kentuckians through education and changes in behavior and in community. Through the Supplemental Nutrition Assistance Program Education (SNAP-Ed) and the Expanded Food and Nutrition Education Program (EFNEP), the University of Kentucky Cooperative Extension Service has agents and nutrition assistants across the state who are dedicated to improving lives in their communities.

### OUR CHALLENGE

#### Poverty

In Kentucky, household median income is **\$45,215**, which is much lower than the U.S. median of **\$55,775**.<sup>1</sup> Kentucky has high rates of poverty and food insecurity when compared to the United States as a whole.<sup>1</sup>

	Kentucky	U.S.
<b>Total Poverty</b>	18.5%	14.7%
<b>Child Poverty</b>	25.9%	20.7%
<b>Food Insecurity</b>	17.6%	13.7%
<b>Very Low Food Secure</b>	7.3%	5.4%

In 2014, an estimated **492** Robertson County residents lived in poverty, and **151** of them were children. This is a **3.6%** increase in total poverty and **8.6%** increase in child poverty since 2007.<sup>2</sup>

#### SNAP benefits

Participation in the SNAP program among those who are eligible for its benefits is higher in Kentucky than in the U.S. as a whole.<sup>1</sup>

In 2015, **439** Robertson County residents received SNAP benefits, a **23.5%** increase since 2007.<sup>3</sup>

	Kentucky	U.S.
<b>SNAP Participation</b>	91%	83%

#### Obesity

Nearly half of all American adults experience one or more preventable, diet-related chronic conditions, such as high blood pressure, cardiovascular disease, type 2 diabetes, and obesity.<sup>4</sup> Kentucky has a high prevalence of hypertension, diabetes, and obesity, ranking in the top 10 when compared to other states.<sup>5</sup> A large body of evidence shows that healthy eating habits and regular physical activity can help people achieve and maintain good health and reduce the risk of chronic disease throughout life.<sup>4</sup>

In 2013, **596** Robertson County residents were considered obese, representing **34.6%** (**41.3%-27.8%**) of the county's population.<sup>6</sup>

## OUR SOLUTION

Provide hands-on, nutrition education to limited-resource audiences, focusing on:

- Buying and preparing healthy foods
- Developing new meal planning and cooking skills
- Adopting new healthy lifestyle behaviors
- Managing SNAP resources

In 2016, **2,858** Robertson County residents with limited resources participated in nutrition education lessons.

## OUR RESULTS

### IN KENTUCKY

#### Lifestyle improvements

In 2016, **95%** of adult participants made a positive change in food group choices and **71%** showed improvement in one or more food safety practices. In addition, **65%** began to plan meals in advance more often and **71%** used the “Nutrition Facts” on food labels to make food choices more often. Youth participants also experienced behavior changes, with **83%** improving their ability to choose healthy foods.

## OUR SUCCESS

### Cooking club aims to decrease obesity

Data from the Robert Wood Johnson Foundation ranks Kentucky eighth in the nation in the percentage of obese children ages 10-17. Current research indicates that children are more likely to try healthy foods if they are involved in meal preparation. In response to this information, the Robertson County Extension agents began the 4-H Cooking Club.

The cooking club is held at a local school with predominantly limited-resource students (The entire student body qualifies for free lunch.). The popularity of the club necessitated inviting volunteers to help oversee the cooking stations during food preparation. Volunteers include five Homemakers, including one of Hispanic ethnicity. Since census data indicates that the Hispanic population is increasing in Robertson County, this will benefit Hispanic club members. Older students, generally 6th-12th graders who attend the class, often help as youth volunteers.

The cooking club is held monthly during the school year from September through April. The club is attended regularly by 40-55 students. The group meets after school in the school’s family resources classroom which is equipped with six cooking stations. Cooking club has taught participants many culinary skills needed to make a wide array of food and snacks with a focus on nutritious options which should result in a positive health impact.
