

Nutrition Education Program

2017 Annual Report: Casey County

Our Focus

The Nutrition Education Program works in all 120 counties to improve the lives of limited-resource Kentuckians through education and changes in behavior and in community. Through the Supplemental Nutrition Assistance Program Education (SNAP-Ed) and the Expanded Food and Nutrition Education Program (EFNEP), the University of Kentucky Cooperative Extension Service has agents and nutrition assistants across the state who are dedicated to improving lives in their communities.

Our Challenge

Poverty

In Kentucky, household median income is \$46,659, which is much lower than the U.S. median of \$57,617.¹ Kentucky has high rates of poverty and food insecurity when compared to the United States as a whole.¹

	Kentucky	U.S.
Total Poverty	18.5%	14.4%
Child Poverty	25%	19.8%
Food Insecurity	17.3%	13%
Very Low Food Secure	7.4%	5.2%

In 2014, an estimated 4,699 Casey County residents lived in poverty, and 1,481 of them were children. This is a 24.9% increase in total poverty and 13.2% increase in child poverty since 2007.²

SNAP benefits

Participation in the SNAP program among those who are eligible for its benefits is higher in Kentucky than in the U.S. as a whole.¹

In 2015, 3,489 Casey County residents received SNAP benefits, a 25.4% increase since 2007.³

	Kentucky	U.S.
SNAP Participation	91%	83%

Obesity

Nearly half of all American adults experience one or more preventable, diet-related chronic conditions, such as high blood pressure, cardiovascular disease, type 2 diabetes, and obesity.⁴ Kentucky has a high prevalence of hypertension, diabetes, and obesity, ranking in the top 10 when compared to other states.⁵ A large body of evidence shows that healthy eating habits and regular physical activity can help people achieve and maintain good health and reduce the risk of chronic disease throughout life.⁴

In 2013, 4,386 Casey County residents were considered obese, representing 36.4% (30.1%-42.3%) of the county's population.⁶

Our Solution

Provide hands-on, nutrition education to limited-resource audiences, focusing on:

- Buying and preparing healthy foods
- Developing new meal planning and cooking skills
- Adopting new healthy lifestyle behaviors
- Managing SNAP resources

In 2017, **2,667** Casey County residents with limited resources participated in nutrition education lessons.

Our Results

IN KENTUCKY

Lifestyle improvements

In 2017, **98%** of adult participants made a positive change in food group choices and **81%** showed improvement in one or more food safety practices. In addition, **71%** began to plan meals in advance more often and **73%** used the “Nutrition Facts” on food labels to make food choices more often. Youth participants also experienced behavior changes, with **85%** improving their ability to choose healthy foods.

Our Success

Garden Share Program helps those in need

Casey County has a higher poverty rate for families with children that exceeds the state average and a large elderly population. Because nutritious foods can be difficult for these populations to access, the FCS Council developed the Casey County Garden Share Program. It links home gardeners who have extra produce with community members who could use it. Special, free produce carts were placed in front of the public library and in a retail parking lot near public housing. Gardeners dropped off extra produce and those who needed it picked it up. The FCS program also placed free healthy recipes and nutrition newsletters on the carts. Carts included feedback forms to help determine effectiveness, future needs and possible future grant monies. The program supplied 2,300 pounds of fresh produce to community members in need. Participants reported that they ate more fresh vegetables and fruit and used healthier recipes to prepare meals. The free produce helped participants stretch food dollars. One said: “You don’t know how much this means to me. I was out of money this week. Now I can feed my children.”
