

# Nutrition Education Program

## 2017 Annual Report: Green County

### Our Focus

The Nutrition Education Program works in all 120 counties to improve the lives of limited-resource Kentuckians through education and changes in behavior and in community. Through the Supplemental Nutrition Assistance Program Education (SNAP-Ed) and the Expanded Food and Nutrition Education Program (EFNEP), the University of Kentucky Cooperative Extension Service has agents and nutrition assistants across the state who are dedicated to improving lives in their communities.

### Our Challenge

#### Poverty

In Kentucky, household median income is \$46,659, which is much lower than the U.S. median of \$57,617.<sup>1</sup> Kentucky has high rates of poverty and food insecurity when compared to the United States as a whole.<sup>1</sup>

	Kentucky	U.S.
<b>Total Poverty</b>	18.5%	14.4%
<b>Child Poverty</b>	25%	19.8%
<b>Food Insecurity</b>	17.3%	13%
<b>Very Low Food Secure</b>	7.4%	5.2%

In 2014, an estimated 2,339 Green County residents lived in poverty, and 670 of them were children. This is a 19.5% increase in total poverty and 2.9% increase in child poverty since 2007.<sup>2</sup>

#### SNAP benefits

Participation in the SNAP program among those who are eligible for its benefits is higher in Kentucky than in the U.S. as a whole.<sup>1</sup>

In 2015, 1,846 Green County residents received SNAP benefits, a 32.3% increase since 2007.<sup>3</sup>

	Kentucky	U.S.
<b>SNAP Participation</b>	91%	83%

#### Obesity

Nearly half of all American adults experience one or more preventable, diet-related chronic conditions, such as high blood pressure, cardiovascular disease, type 2 diabetes, and obesity.<sup>4</sup> Kentucky has a high prevalence of hypertension, diabetes, and obesity, ranking in the top 10 when compared to other states.<sup>5</sup> A large body of evidence shows that healthy eating habits and regular physical activity can help people achieve and maintain good health and reduce the risk of chronic disease throughout life.<sup>4</sup>

In 2013, 3,250 Green County residents were considered obese, representing 38.1% (31.6%-45.5%) of the county's population.<sup>6</sup>

## Our Solution

Provide hands-on, nutrition education to limited-resource audiences, focusing on:

- Buying and preparing healthy foods
- Developing new meal planning and cooking skills
- Adopting new healthy lifestyle behaviors
- Managing SNAP resources

In 2017, **4,284** Green County residents with limited resources participated in nutrition education lessons.

## Our Results

### IN KENTUCKY

#### Lifestyle improvements

In 2017, **98%** of adult participants made a positive change in food group choices and **81%** showed improvement in one or more food safety practices. In addition, **71%** began to plan meals in advance more often and **73%** used the “Nutrition Facts” on food labels to make food choices more often. Youth participants also experienced behavior changes, with **85%** improving their ability to choose healthy foods.

## Our Success

### Class helps to conserve time and energy... and enjoy healthier cooking!

**A**fter fielding several questions about the use of small appliances in the kitchen, FCS agents for Adair, Cumberland and Green counties collaborated on a demonstration of three small appliances: the electric pressure cooker, a jam and jelly maker and an air fryer. During the program, 27 participants learned more about food safety practices and the benefits of using small appliances to conserve time, energy and enjoy healthier cooking. Recipes that were safe for use with the appliances were demonstrated in the classes, and participants sampled finished products. The program evaluation showed that all participants had learned more about how to use the products. Some 95% had previously purchased one of the products but had not used it because they didn't know enough about them. Because of the demonstration, they said they would use the appliance more often. Comments from participants included, “I plan to purchase the pressure cooker. Love the actual demonstrations of recipes and that we got to sample,” and “I loved this class! Thanks for offering it to the public! I learned a lot and enjoyed the different small appliances that were demonstrated.”
