

Our Focus

he Nutrition Education Program works in all 120 counties to improve the lives of limited-resource Kentuckians through education and changes in behavior and in community. Through the Supplemental Nutrition Assistance Program Education (SNAP-Ed) and the Expanded Food and Nutrition Education Program (EFNEP), the University of Kentucky Cooperative Extension Service has agents and nutrition assistants across the state who are dedicated to improving lives in their communities.

Our Challenge

Poverty

In Kentucky, household median income is \$46,659, which is much lower than the U.S. median of \$57,617. Kentucky has high rates of poverty and food insecurity when compared to the United States as a whole.

	Kentucky	U.S.
Total Poverty	18.5%	14.4%
Child Poverty	25%	19.8%
Food Insecurity	17.3%	13%
Very Low Food Secure	7.4%	5.2%

In 2014, an estimated **1,193** Hancock County residents lived in poverty, and **413** of them were children. This is a **2.0**% increase in total poverty and **6.4**% increase in child poverty since 2007.²

SNAP benefits

Participation in the SNAP program among those who are eligible for its benefits is higher in Kentucky than in the U.S. as a whole.¹

In 2015, **941** Hancock County residents received SNAP benefits, a **22.3%** increase since 2007.³

	Kentucky	U.S.
SNAP Participation	91%	83%

Obesity

Nearly half of all American adults experience one or more preventable, diet-related chronic conditions, such as high blood pressure, cardiovascular disease, type 2 diabetes, and obesity. Kentucky has a high prevalence of hypertension, diabetes, and obesity, ranking in the top 10 when compared to other states. A large body of evidence shows that healthy eating habits and regular physical activity can help people achieve and maintain good health and reduce the risk of chronic disease throughout life.

In 2013, **2,176** Hancock County residents were considered obese, representing **34.5% (27.7%-41.8%)** of the county's population.⁶

Our Solution

Provide hands-on, nutrition education to limited-resource audiences, focusing on:

- Buying and preparing healthy foods
- Developing new meal planning and cooking skills
- Adopting new healthy lifestyle behaviors
- Managing SNAP resources

In 2017, **1,623** Hancock County residents with limited resources participated in nutrition education lessons.

Our Results

IN KENTUCKY

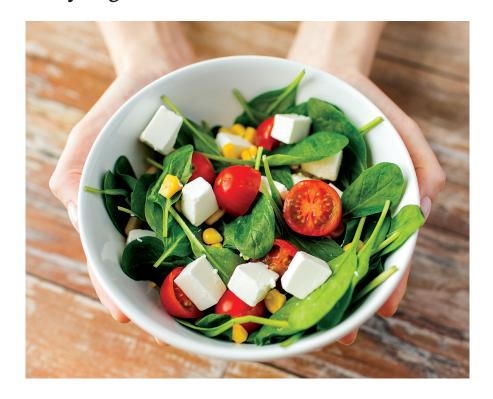

Lifestyle improvements

In 2017, 98% of adult participants made a positive change in food group choices and 81% showed improvement in one or more food safety practices. In addition, 71% began to plan meals in advance more often and 73% used the "Nutrition Facts" on food labels to make food choices more often. Youth participants also experienced behavior changes, with 85% improving their ability to choose healthy foods.

Our Success

Hancock County High School health fair

ancock County Health Coalition worked with the local HOSA Club and 4-H to offer a Student Health Fair at the local high school. The fair was a collaborative effort with Hancock County Cooperative Extension, the Kentucky Cancer Program, Hancock County EMS, local hospitals and other local community centers. Offered to all students in grades 9-12, topics included choosing a healthy drink, physical exercise, healthy relationships, and diabetes, among others. In a written evaluation, 26% of the students learned the amount of sugar in soft/sports drinks and 44% pledged to make healthier food choices.
