

# Nutrition Education Program

## 2017 Annual Report: Monroe County

### Our Focus

The Nutrition Education Program works in all 120 counties to improve the lives of limited-resource Kentuckians through education and changes in behavior and in community. Through the Supplemental Nutrition Assistance Program Education (SNAP-Ed) and the Expanded Food and Nutrition Education Program (EFNEP), the University of Kentucky Cooperative Extension Service has agents and nutrition assistants across the state who are dedicated to improving lives in their communities.

### Our Challenge

#### Poverty

In Kentucky, household median income is \$46,659, which is much lower than the U.S. median of \$57,617.<sup>1</sup> Kentucky has high rates of poverty and food insecurity when compared to the United States as a whole.<sup>1</sup>

	Kentucky	U.S.
<b>Total Poverty</b>	18.5%	14.4%
<b>Child Poverty</b>	25%	19.8%
<b>Food Insecurity</b>	17.3%	13%
<b>Very Low Food Secure</b>	7.4%	5.2%

In 2014, an estimated 2,748 Monroe County residents lived in poverty, and 916 of them were children. This is a -5.1% decrease in total poverty and 4.4% increase in child poverty since 2007.<sup>2</sup>

#### SNAP benefits

Participation in the SNAP program among those who are eligible for its benefits is higher in Kentucky than in the U.S. as a whole.<sup>1</sup>

In 2015, 2,407 Monroe County residents received SNAP benefits, a 31.2% increase since 2007.<sup>3</sup>

	Kentucky	U.S.
<b>SNAP Participation</b>	91%	83%

#### Obesity

Nearly half of all American adults experience one or more preventable, diet-related chronic conditions, such as high blood pressure, cardiovascular disease, type 2 diabetes, and obesity.<sup>4</sup> Kentucky has a high prevalence of hypertension, diabetes, and obesity, ranking in the top 10 when compared to other states.<sup>5</sup> A large body of evidence shows that healthy eating habits and regular physical activity can help people achieve and maintain good health and reduce the risk of chronic disease throughout life.<sup>4</sup>

In 2013, 2,409 Monroe County residents were considered obese, representing 29.9% (23.4%-36.8%) of the county's population.<sup>6</sup>

## Our Solution

Provide hands-on, nutrition education to limited-resource audiences, focusing on:

- Buying and preparing healthy foods
- Developing new meal planning and cooking skills
- Adopting new healthy lifestyle behaviors
- Managing SNAP resources

In 2017, **1,879** Monroe County residents with limited resources participated in nutrition education lessons.

## Our Results

### IN KENTUCKY

#### Lifestyle improvements

In 2017, **98%** of adult participants made a positive change in food group choices and **81%** showed improvement in one or more food safety practices. In addition, **71%** began to plan meals in advance more often and **73%** used the “Nutrition Facts” on food labels to make food choices more often. Youth participants also experienced behavior changes, with **85%** improving their ability to choose healthy foods.

## Our Success

### Small changes make a big difference

**T**he Monroe NEP Assistant partnered with the Adult Family Literacy program to organize an English as Second Language program. As part of this gathering, participants learn healthy lifestyle choices through MyPlate and Healthy Choices for Every Body, including nutrition, meal planning, budgeting, reading labels and food safety. All 18 participants have made positive changes in their diet. One participant reported that she now buys skim milk for her family instead of whole milk.
