

Nutrition Education Program

2017 Annual Report: Ohio County

Our Focus

The Nutrition Education Program works in all 120 counties to improve the lives of limited-resource Kentuckians through education and changes in behavior and in community. Through the Supplemental Nutrition Assistance Program Education (SNAP-Ed) and the Expanded Food and Nutrition Education Program (EFNEP), the University of Kentucky Cooperative Extension Service has agents and nutrition assistants across the state who are dedicated to improving lives in their communities.

Our Challenge

Poverty

In Kentucky, household median income is \$46,659, which is much lower than the U.S. median of \$57,617.¹ Kentucky has high rates of poverty and food insecurity when compared to the United States as a whole.¹

	Kentucky	U.S.
Total Poverty	18.5%	14.4%
Child Poverty	25%	19.8%
Food Insecurity	17.3%	13%
Very Low Food Secure	7.4%	5.2%

In 2014, an estimated 4,633 Ohio County residents lived in poverty, and 1,656 of them were children. This is a 2.9% increase in total poverty and 4.5% increase in child poverty since 2007.²

SNAP benefits

Participation in the SNAP program among those who are eligible for its benefits is higher in Kentucky than in the U.S. as a whole.¹

In 2015, 3,801 Ohio County residents received SNAP benefits, a 20.1% increase since 2007.³

	Kentucky	U.S.
SNAP Participation	91%	83%

Obesity

Nearly half of all American adults experience one or more preventable, diet-related chronic conditions, such as high blood pressure, cardiovascular disease, type 2 diabetes, and obesity.⁴ Kentucky has a high prevalence of hypertension, diabetes, and obesity, ranking in the top 10 when compared to other states.⁵ A large body of evidence shows that healthy eating habits and regular physical activity can help people achieve and maintain good health and reduce the risk of chronic disease throughout life.⁴

In 2013, 6,542 Ohio County residents were considered obese, representing 37.2% (31.4%-43.2%) of the county's population.⁶

Our Solution

Provide hands-on, nutrition education to limited-resource audiences, focusing on:

- Buying and preparing healthy foods
- Developing new meal planning and cooking skills
- Adopting new healthy lifestyle behaviors
- Managing SNAP resources

In 2017, 29,675 Ohio County residents with limited resources participated in nutrition education lessons.

Our Results

IN KENTUCKY

Lifestyle improvements

In 2017, 98% of adult participants made a positive change in food group choices and 81% showed improvement in one or more food safety practices. In addition, 71% began to plan meals in advance more often and 73% used the “Nutrition Facts” on food labels to make food choices more often. Youth participants also experienced behavior changes, with 85% improving their ability to choose healthy foods.

Our Success

1,000+ students participate in nutrition program

Ohio County has high rates of diabetes and obesity. Many health problems among adults and children are tied to poor nutrition. The Cooperative Extension Service has partnered with the Ohio County school system to provide classroom education and the Body Walk program, which helps students make healthier choices on a limited budget and choose an active lifestyle consistent with current dietary guidelines and MyPlate. More than 1,000 students participated in a nutrition education program that focused on eating a healthier breakfast. Twenty percent of the students reported they did not eat breakfast. Students made a whole-grain pancake and then added 100% maple syrup as a topping. Handouts on eating a healthy breakfast and the University of Kentucky’s ChopChop magazine were distributed. Spanish copies were also provided as requested. Program evaluations showed that 75% of students had a better understanding of healthy breakfast eating patterns and 84% said they plan to make changes in their diet, including adding more fruits and vegetables. When asked the most significant thing they plan to change in their daily life responses included: eat a healthy breakfast, eat more fruits and vegetables, drink more water, reduce sugar/salt intake and take better care of my body.
