

Our Focus

The Nutrition Education Program works in all 120 counties to improve the lives of limited-resource Kentuckians through education and changes in behavior and in their community. Through the Supplemental Nutrition Assistance Program Education (SNAP-Ed) and the Expanded Food and Nutrition Education Program (EFNEP), the University of Kentucky Cooperative Extension Service has agents and nutrition assistants across the state who are dedicated to improving lives where they live.

Our Challenge

Poverty

According to US Census estimates for 2016, the median household income in Kentucky is **\$46,610**, almost 20% lower than the U.S. median household income of **\$57,617**.¹ Kentucky also has higher percentages of poverty and food insecurity among its population compared to census estimate for the United States overall.

	Kentucky	U.S.
Total Poverty	17.2%	12.3%
Child Poverty	24.4%	19.5%
Food Insecurity	14.7%	11.8%

In 2016, an estimated **4,260** Casey County residents lived in poverty, and **1,285** of those were children under 18. This represents a **1.6%** increase in total poverty and **5.1%** decrease in child poverty since 2008.¹

Obesity

Today, about half of all Americans have one or more chronic diseases, often related to poor diet.² These include high blood pressure, cardiovascular disease, type 2 diabetes and stroke which are often associated with obesity.

In 2017, the percentage of obese adults in Kentucky was **34.3%**, ranking it in the top 10 states for highest obesity rates in the country. Kentucky was also ranked in the top 10 for high percentages of adults with diabetes (**12.9%**) and adults with hypertension (**39.4%**).³ A large body of evidence shows that healthy eating habits and regular physical activity can help people achieve and maintain good health and reduce the risk of chronic disease throughout life.²

In 2014, **36.7%** of Casey County's adult population were considered obese.⁴

Our Solution

Provide hands-on, nutrition education to limited-resource audiences, focusing on:

- Buying and preparing healthy foods
- Developing new meal planning and cooking skills
- Adopting new healthy lifestyle behaviors
- Managing SNAP resources

In 2018, 4,953 Casey County residents with limited resources participated in nutrition education lessons.

Our Results

IN KENTUCKY

Lifestyle improvements

In 2018, 95% of adult participants made a positive change in food group choices and 91% showed improvement in one or more food safety practices. In addition, 90% showed improvement in one or more food resource management practices and 83% made changes to be more physically active. Youth participants also experienced behavior changes, with 83% improving their ability to choose healthy foods.

Our Success

Super Star Chef camp helps kids shine in the kitchen

Twelve Casey County youth participated in a Super Star Chef Youth Cooking Camp Summer 2018 hosted by the Nutrition Education Program along with the Casey County Cooperative Extension Office. Students, ages 9-18, participated in the multi-day camp. Youth gained a variety hands-on skills in healthy foods and nutrition, MyPlate guidelines, nutrition label reading, adapting recipes, reading and following recipes, and healthy menu selection. In addition, youth practiced a host of life skills that they can use for a lifetime of healthy eating. They utilized safe food and kitchen safety practices, safe knife handling skills, accurate measuring and proper safe use of kitchen tools and appliances. Youth prepared and taste tested multiple recipes each day. They also reported sharing recipes and learned skills with their families.
