

## Our Focus

The Nutrition Education Program works in all 120 counties to improve the lives of limited-resource Kentuckians through education and changes in behavior and in their community. Through the Supplemental Nutrition Assistance Program Education (SNAP-Ed) and the Expanded Food and Nutrition Education Program (EFNEP), the University of Kentucky Cooperative Extension Service has agents and nutrition assistants across the state who are dedicated to improving lives where they live.

## Our Challenge

### Poverty

According to US Census estimates for 2016, the median household income in Kentucky is **\$46,610**, almost 20% lower than the U.S. median household income of **\$57,617**.<sup>1</sup> Kentucky also has higher percentages of poverty and food insecurity among its population compared to census estimate for the United States overall.

	Kentucky	U.S.
<b>Total Poverty</b>	17.2%	12.3%
<b>Child Poverty</b>	24.4%	19.5%
<b>Food Insecurity</b>	14.7%	11.8%

In 2016, an estimated **1,712** Fulton County residents lived in poverty, and **598** of those were children under 18. This represents a **13.7%** decrease in total poverty and **12.4%** decrease in child poverty since 2008.<sup>1</sup>

### Obesity

Today, about half of all Americans have one or more chronic diseases, often related to poor diet.<sup>2</sup> These include high blood pressure, cardiovascular disease, type 2 diabetes and stroke which are often associated with obesity.

In 2017, the percentage of obese adults in Kentucky was **34.3%**, ranking it in the top 10 states for highest obesity rates in the country. Kentucky was also ranked in the top 10 for high percentages of adults with diabetes (**12.9%**) and adults with hypertension (**39.4%**).<sup>3</sup> A large body of evidence shows that healthy eating habits and regular physical activity can help people achieve and maintain good health and reduce the risk of chronic disease throughout life.<sup>2</sup>

In 2014, **34.3%** of Fulton County's adult population were considered obese.<sup>4</sup>

## Our Solution

Provide hands-on, nutrition education to limited-resource audiences, focusing on:

- Buying and preparing healthy foods
- Developing new meal planning and cooking skills
- Adopting new healthy lifestyle behaviors
- Managing SNAP resources

In 2018, 3,711 Fulton County residents with limited resources participated in nutrition education lessons.

## Our Results

### IN KENTUCKY

#### Lifestyle improvements

In 2018, 95% of adult participants made a positive change in food group choices and 91% showed improvement in one or more food safety practices. In addition, 90% showed improvement in one or more food resource management practices and 83% made changes to be more physically active. Youth participants also experienced behavior changes, with 83% improving their ability to choose healthy foods.

## Our Success

### Kids learn proper hand washing to help stay healthy

According to the Centers for Disease Control and Prevention, regular handwashing is one of the best ways to remove germs, avoid getting sick and prevent the spread of germs to others. Research shows that people need to vigorously wash their hands for about 15 to 20 seconds to kill any type of dangerous bacteria, yet most individuals do not meet this timeframe. Without executing the correct hand sanitizing techniques, dirt and bacteria that would typically be sent down the drain stay on the hands and increases the likelihood of becoming seriously ill. With this in mind, the Fulton County Family and Consumer Sciences agent and 4-H Youth and Development agent partnered with Carr Elementary School to offer Germ Busters to all kindergarten through fifth-grade students. Fulton City Elementary School, which had several days where many students were absent from school due to various illnesses, also requested Germ Busters. The program was conducted over the course of a week and reached 163 kindergarten through fifth-grade students. Over the past six years, the program has reached 860 students, educating them about the importance of handwashing and correct handwashing steps.
