

Our Focus

The Nutrition Education Program works in all 120 counties to improve the lives of limited-resource Kentuckians through education and changes in behavior and in their community. Through the Supplemental Nutrition Assistance Program Education (SNAP-Ed) and the Expanded Food and Nutrition Education Program (EFNEP), the University of Kentucky Cooperative Extension Service has agents and nutrition assistants across the state who are dedicated to improving lives where they live.

Our Challenge

Poverty

According to US Census estimates for 2016, the median household income in Kentucky is **\$46,610**, almost 20% lower than the U.S. median household income of **\$57,617**.¹ Kentucky also has higher percentages of poverty and food insecurity among its population compared to census estimate for the United States overall.

	Kentucky	U.S.
Total Poverty	17.2%	12.3%
Child Poverty	24.4%	19.5%
Food Insecurity	14.7%	11.8%

In 2016, an estimated **2,723** Union County residents lived in poverty, and **643** of those were children under 18. This represents a **0.2%** increase in total poverty and **18%** decrease in child poverty since 2008.¹

Obesity

Today, about half of all Americans have one or more chronic diseases, often related to poor diet.² These include high blood pressure, cardiovascular disease, type 2 diabetes and stroke which are often associated with obesity.

In 2017, the percentage of obese adults in Kentucky was **34.3%**, ranking it in the top 10 states for highest obesity rates in the country. Kentucky was also ranked in the top 10 for high percentages of adults with diabetes (**12.9%**) and adults with hypertension (**39.4%**).³ A large body of evidence shows that healthy eating habits and regular physical activity can help people achieve and maintain good health and reduce the risk of chronic disease throughout life.²

In 2014, **31.3%** of Union County's adult population were considered obese.⁴

Our Solution

Provide hands-on, nutrition education to limited-resource audiences, focusing on:

- Buying and preparing healthy foods
- Developing new meal planning and cooking skills
- Adopting new healthy lifestyle behaviors
- Managing SNAP resources

In 2018, 2,574 Union County residents with limited resources participated in nutrition education lessons.

Our Results

IN KENTUCKY

Lifestyle improvements

In 2018, 95% of adult participants made a positive change in food group choices and 91% showed improvement in one or more food safety practices. In addition, 90% showed improvement in one or more food resource management practices and 83% made changes to be more physically active. Youth participants also experienced behavior changes, with 83% improving their ability to choose healthy foods.

Our Success

Hands-on cooking classes inspire participants to make healthier choices

Kentucky adults rank among the ten highest in the nation for poor consumption of fruits and vegetables, according to the Centers for Disease Control and Prevention. The Plate It Up Kentucky Proud program was created to promote Kentucky-grown products and markets and encourage an increase in fruit and vegetable consumption. The Union County Family and Consumer Sciences agent offered a "Simply Cooking" Plate It Up Kentucky Proud to Union County residents. These four hands-on cooking classes offered participants the opportunity to prepare and evaluate six different recipes. Nutrition educational material was provided to participants, as well as recipes and cooking tips. After the program, 100% said they were likely to purchase products to make the recipes at home. One participant who attended expressed her and her daughter's newfound likeness for asparagus, stating that she had not tried it previously.
