

Our Focus

The Kentucky Nutrition Education Program, as part of the University of Kentucky Cooperative Extension Service, encompasses two separate USDA programs: The Expanded Food and Nutrition Education Program (EFNEP) and the Supplemental Nutrition Assistance Program Education (SNAP-Ed). Both programs utilize agents and assistants to provide educational opportunities for limited-resource individuals and families to acquire knowledge, develop skills, and change behaviors for improved health and well-being.

Our Challenge

Poverty

According to US Census estimates for 2017, the median household income in Kentucky is **\$48,332**, almost 20% lower than the U.S. median household income of **\$60,336**.¹ Kentucky also has higher percentages of poverty and food insecurity among its population compared to census estimate for the United States overall.

	Kentucky	U.S.
Total Poverty	17.1%	13.4%
Child Poverty	22.1%	18.4%
Food Insecurity	14.7%	12.3%

In 2017, an estimated **2,673** Clinton County residents lived in poverty, and an estimated **794** were children under 18.¹

Obesity

Today, about half of all Americans have one or more chronic diseases, often related to poor diet and physical inactivity.² These include high blood pressure, cardiovascular disease, type 2 diabetes and stroke.

In 2017, the percentage of obese adults in Kentucky was **34.3%**, ranking it in the top 10 states for highest obesity rates in the country. The percentage of physically inactive Kentuckians was **34.4%**, ranking it as the most physically inactive state in the nation. Kentucky was also ranked in the top 10 for high percentages of adults with diabetes (**12.9%**) and adults with hypertension (**39.4%**).³ A large body of evidence shows that healthy eating habits and regular physical activity can help people achieve and maintain good health and reduce the risk of chronic disease throughout life.²

In 2015, **36.8%** of Clinton County's adult population were considered obese, and **33.5%** were considered physically inactive.⁴

Our Solution

Provide hands-on, nutrition education to limited-resource audiences, focusing on:

- Buying and preparing healthy foods
- Developing new meal planning and cooking skills
- Adopting new healthy lifestyle behaviors
- Managing SNAP resources

In 2019, 6,293 contacts were made with Clinton County residents who participated in nutrition education programming.

Our Results

IN CLINTON COUNTY

Lifestyle improvements

In 2019, 96% of adult participants made a positive change in food group choices and 88% showed improvement in one or more food safety practices. In addition, 89% showed improvement in one or more food resource management practices and 100% made changes to be more physically active. Youth participants also experienced behavior changes, with 75% improving their ability to choose healthy foods.

Our Success

Let's Cook Together

Planning meals is one of the best ways to save money and eat healthy meals. The Clinton County Nutrition Education Program assistant partnered with Adanta Behavioral Services to offer a “Let’s Cook Together” program. This program consisted of four adult participants and, at times, their family members. Participants were taught basic nutrition and resource management using the Healthy Choices for Every Body curriculum. Participants engaged in hands-on activities to encourage meal planning and increased knowledge of tips and techniques to prepare more meals at home. As a result of the program, 50% of the participants cook more meals at home, and 75% make grocery lists more often and check their cupboards before heading to the store. By utilizing all of the skills learned, the participants were able to plan and prepare healthy, nutritious meals for their families at home.
