

Our Focus

The Kentucky Nutrition Education Program, as part of the University of Kentucky Cooperative Extension Service, encompasses two separate USDA programs: The Expanded Food and Nutrition Education Program (EFNEP) and the Supplemental Nutrition Assistance Program Education (SNAP-Ed). Both programs utilize agents and assistants to provide educational opportunities for limited-resource individuals and families to acquire knowledge, develop skills, and change behaviors for improved health and well-being.

Our Challenge

Poverty

According to US Census estimates for 2017, the median household income in Kentucky is **\$48,332**, almost 20% lower than the U.S. median household income of **\$60,336**.¹ Kentucky also has higher percentages of poverty and food insecurity among its population compared to census estimate for the United States overall.

	Kentucky	U.S.
Total Poverty	17.1%	13.4%
Child Poverty	22.1%	18.4%
Food Insecurity	14.7%	12.3%

In 2017, an estimated **15,714** Daviess County residents lived in poverty, and an estimated **5,167** were children under 18.¹

Obesity

Today, about half of all Americans have one or more chronic diseases, often related to poor diet and physical inactivity.² These include high blood pressure, cardiovascular disease, type 2 diabetes and stroke.

In 2017, the percentage of obese adults in Kentucky was **34.3%**, ranking it in the top 10 states for highest obesity rates in the country. The percentage of physically inactive Kentuckians was **34.4%**, ranking it as the most physically inactive state in the nation. Kentucky was also ranked in the top 10 for high percentages of adults with diabetes (**12.9%**) and adults with hypertension (**39.4%**).³ A large body of evidence shows that healthy eating habits and regular physical activity can help people achieve and maintain good health and reduce the risk of chronic disease throughout life.²

In 2015, **33.4%** of Daviess County's adult population were considered obese, and **25.5%** were considered physically inactive.⁴

Our Solution

Provide hands-on, nutrition education to limited-resource audiences, focusing on:

- Buying and preparing healthy foods
- Developing new meal planning and cooking skills
- Adopting new healthy lifestyle behaviors
- Managing SNAP resources

In 2019, **14,949** contacts were made with Daviess County residents who participated in nutrition education programming.

Our Results

IN DAVIESS COUNTY

Lifestyle improvements

In 2019, **97%** of adult participants made a positive change in food group choices and **83%** showed improvement in one or more food safety practices. In addition, **92%** showed improvement in one or more food resource management practices and **90%** made changes to be more physically active. Youth participants also experienced behavior changes, with **87%** improving their ability to choose healthy foods.

Our Success

Healthy Youth

As a 21st Century grant partner, Daviess County 4-H provided a series of six healthy living lessons for 18 third- to fifth-graders during an after-school program at Estes Elementary. The school is located in a low income area next to the Rolling Heights apartments, operated by the Owensboro Housing Authority. The lessons included proper breathing activities, and techniques for calming and stress relief, proper hand-washing, stretching exercises, and healthy snacking. For healthy snacks the youth had the opportunity to make turkey tortilla roll-ups and strawberry or blueberry yogurt parfaits. By a show of hands, approximately 50% of the youth tried something new at each of the healthy snack sessions.
