

Our Focus

The Kentucky Nutrition Education Program, as part of the University of Kentucky Cooperative Extension Service, encompasses two separate USDA programs:

The Expanded Food and Nutrition Education Program (EFNEP) and the Supplemental Nutrition Assistance Program Education (SNAP-Ed). Both programs utilize agents and assistants to provide educational opportunities for limited-resource individuals and families to acquire knowledge, develop skills, and change behaviors for improved health and well-being.

Our Challenge

Poverty

According to US Census estimates for 2017, the median household income in Kentucky is \$48,332, almost 20% lower than the U.S. median household income of \$60,336. Kentucky also has higher percentages of poverty and food insecurity among its population compared to census estimate for the United States overall.

	Kentucky	U.S.
Total Poverty	17.1%	13.4%
Child Poverty	22.1%	18.4%
Food Insecurity	14.7%	12.3%

In 2017, an estimated **2,542** Monroe County residents lived in poverty, and an estimated **782** were children under 18.¹

Obesity

Today, about half of all Americans have one or more chronic diseases, often related to poor diet and physical inactivity.² These include high blood pressure, cardiovascular disease, type 2 diabetes and stroke.

In 2017, the percentage of obese adults in Kentucky was 34.3%, ranking it in the top 10 states for highest obesity rates in the country. The percentage of physically inactive Kentuckians was 34.4%, ranking it as the most physically inactive state in the nation. Kentucky was also ranked in the top 10 for high percentages of adults with diabetes (12.9%) and adults with hypertension (39.4%). A large body of evidence shows that healthy eating habits and regular physical activity can help people achieve and maintain good health and reduce the risk of chronic disease throughout life.²

In 2015, **35.2**% of Monroe County's adult population were considered obese, and **32.8**% were considered physically inactive.⁴

Our Solution

Provide hands-on, nutrition education to limited-resource audiences, focusing on:

- Buying and preparing healthy foods
- Developing new meal planning and cooking skills
- Adopting new healthy lifestyle behaviors
- Managing SNAP resources

In 2019, **6,562** contacts were made with Monroe County residents who participated in nutrition education programming.

Our Results

IN KENTUCKY

Lifestyle improvements

In 2019, 97% of adult participants made a positive change in food group choices and 83% showed improvement in one or more food safety practices. In addition, 92% showed improvement in one or more food resource management practices and 90% made changes to be more physically active. Youth participants also experienced behavior changes, with 87% improving their ability to choose healthy foods.

Our Success

Backpacks Help with Nutrition

n 2008, Monroe County received the Engaging Youth in Serving Communities grant. The grant challenged teens to identify a community issue and work with adults and organizations toward a solution. Choosing childhood hunger as their project, a group of teens partnered with the Family Resource Center and developed a plan to work within the school system to identify youth in need and deliver backpacks of non-perishable food items to the schools each week. The teens also sent personal care items. This helped youth receiving the backpacks build self-esteem and focus more on schoolwork rather than basic items they lacked. The teens in the program learned people are willing to help solve a problem if someone steps up and organizes the effort. The leadership skills developed in this program were extensive and the sense of self-fulfillment is lifelong. Over the past 11 years, the program has grown, helping 190 children each week. Youth volunteers pick up the bags of food from the Extension office to deliver to schools. With help from churches, private donations, local businesses, and other organizations, backpacks of food have been delivered weekly to Monroe County's children, and now over \$15,000 is raised annually to support the program.
