KENTUCKY NUTRITION BUCATION PROBABLE 2020 ANNUAL REPORT: ROCKCASTLE COUNTY

OUR FOCUS

The Kentucky Nutrition Education Program, as part of the University of Kentucky Cooperative Extension Service, encompasses two separate USDA programs: The Expanded Food and Nutrition Education Program (EFNEP) and the Supplemental Nutrition Assistance Program Education (SNAP-Ed). Both programs utilize agents and assistants to provide educational opportunities for limited-resource individuals and families to acquire knowledge, develop skills, and change behaviors for improved health and well-being.

OUR CHALLENGE

Poverty

According to U.S. Census estimates for 2019, the median household income in Kentucky is **\$52,256**, 20% lower than the U.S. median household income of **\$65,712**.¹ Kentucky also has higher percentages of poverty and food insecurity among its population compared to census estimates for the United States overall.

	Kentucky	U.S.
Total Poverty ¹	16.0%	12.3%
Child Poverty ¹	20.9%	16.8%
Food Insecurity ² (Actual ratings during COVID-19 may be higher)	14.7%	11.7%

In 2018, an estimated **22.8%** of Rockcastle County residents lived in poverty, and an estimated **30.2%** were children younger than 18.¹

Obesity

Today, about half of all Americans have one or more chronic diseases, often related to poor diet and physical inactivity.³ These include high blood pressure, cardiovascular disease, type 2 diabetes, and stroke.

In 2019, the percentage of obese adults in Kentucky was **36.5**%, ranking it in the top 10 states for highest obesity rates in the country. The percentage of physically inactive Kentuckians was **30.6**%, ranking it among the top five most physically inactive states in the nation. Kentucky was also ranked in the top 10 for high percentages of adults with diabetes **(13.3%)** and adults with hypertension **(40.9%)**.⁴ A large body of evidence shows that healthy eating habits and regular physical activity can help people achieve and maintain good health and reduce the risk of chronic disease throughout life.³

In 2020, **34%** of Rockcastle County's adult population was considered obese, and **36%** was considered physically inactive.⁵

OUR SOLUTION

Provide hands-on nutrition education to limited-resource audiences, focusing on:

- Buying and preparing healthy foods
- Developing new meal planning and cooking skills
- Adopting new healthy lifestyle behaviors
- Managing SNAP resources

In 2020, **933** contacts were made with Rockcastle County residents who participated in nutrition education programming.

OUR RESULTS

IN KENTUCKY

Lifestyle improvements

In 2020, **96%** of adult participants made a positive change in food group choices and **75%** showed improvement in one or more food safety practices. In addition,

92% showed improvement in one or more food resource management practices and 83% made changes to be more physically active.

OUR SUCCESS

Cook Together, Eat Together

uring the spring and fall of 2019, the Rockcastle County Family and Consumer Sciences program offered three separate sessions of Cook Together, Eat Together. The FCS agent led the food preparation sessions and taught the basic skills to the youths in the program. Each session of the program had six dinner socials. A total of 22 youths, (accompanied by 16 adults) participated in the programs. A total of 21 youths earned their cookbooks by attending at least three of the six sessions of the program. In post-evaluations, 75% of the youths reported eating more healthy meals. Almost all (90%) of the youths reported that they had tried a new food. One parent reported that her child had always refused to try eggs; however, during the session on breakfast, the child tried and liked frittatas.
